

Siemens PLM Connection ASEAN User Conference 2010

Introduction

Siemens PLM Connection is a set of annual unified user conferences hosted around the world to connect all people who provide value to and derive value from Siemens PLM Software products including users and senior management, developers and partners. The conferences **help companies stay ahead of their competition and transform their processes of innovation.**

Why Attend?

The conference focuses on providing valuable information from Siemens PLM and users alike, in the form of **technical presentations, best practices, tips and tricks, as well as implementation and integration efforts.** Most importantly, the networking opportunities with industry experts and 'live' demo sessions enhance attendees' participation.

Who Should Attend?

Designers, Engineers, IT Support Personnel, Developers and Managers are all encouraged to attend this conference.

Agenda

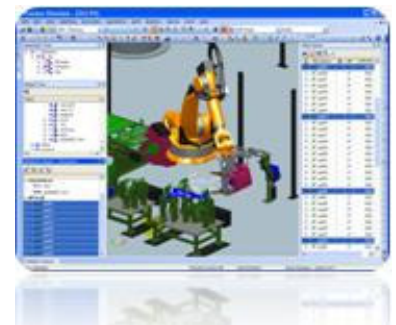

Siemens PLM Software partners are scheduled to provide sessions and presentations at this conference. Technical sessions are divided into three tracks covering Siemens leading products: NX, Teamcenter and the Velocity Series. ([See full agenda](#))

NX CAD/CAM/CAE

Teamcenter

Tecnomatix
